2kg Inner Box
Custom Box

1kg & 2kg Bag
Custom Rider

Kraft Master 20 Kg product
Label // 2 Kg Inner box +
custom label

White Master 10 Kg
Custom Brand

G. TREATMENT

Our product is treated during harvests. The treatment is carried out with sodium metabisulfite in a residual concentration of 80 to 100ppm.

1. TREATED / HYDRATED: in case of value-added product, the best option to use chemistry would be the P&D, since, being open, the moisturizing will reach more.

2. NON TREATED/NON HYDRATED: In case of value-added product, the best one to be NON TREATED will be PPV, since, not being open, is the one which best appearance conserves.

G. QUALITY CONTROL

At Roda Internacional we have a quality control team of professional inspectors with more than 18 years' experience in handling and quality control of different presentations of Vannamei Shrimps. We demand the highest international standards of quality and safety, developing technological processes that can provide our clients with all the relevant information in real time.
